

## Zycortal/Pred Survey

6/2/2016

With participation by members of CARE, AddisonDogs, Addisons Disease in Dogs, & other groups

	Dog's name	Please note any issues or side effects your dog has been experiencing since starting Zycortal and Prednisone.	Have the issues been resolved yet?	How did you resolve the issues or how are you trying to resolve the issues?
1	Millie	Aggression	Yes, it was only in the first couple of days because we only had 5mg tablets of pred, we were giving her 1/2 tablet, so really it was 2.5mg she was getting when it should have been 1.5mg! We didn't really think it would make that much difference, but obviously she must be super sensitive to pred!	Resolved within days as soon as we got some 1mg pred to split.
2	Butler	Better appetite to start now not so good	No	Will start prednisone reduction
3	Grace	Excessive thirst, Lethargy/lack of energy, Panting, Laryngeal dysphagia has worsened	No	Trying slightly lower pred dose
4	Freya	Excessive urination, Excessive thirst	Yes, these symptoms were seen in the first couple of days and not since.	I believe it was the combination of Florinef, Zycortal and then prednisolone in the system on the first couple of days that caused it.
5	Gem	Excessive urination, Excessive thirst, Aggression, Panting, Lack of appetite	These symptoms are down to different things. Lack of appetite ( stopped eating) stress and in freeze frame mode, 5- 6 days after Zycortal due to no preds when Zycortal first started . Then 10 mg, 5 mg, 2 mg preds affected her . restless, needing loo, sketchy, doing strange sudden dashes about and uncomfortable and seemed like had stomach issue too . Aggressive, even at 2 mg pred but all ok now	Resolved by having daily preds and bringing down to 1 mg instead of higher
6	Cookie	Excessive urination, Excessive thirst, Excessive hunger, Lethargy/lack of energy, Diarrhoea	No.	We are going to monitor now the Pred has started.
7	Lexie	Excessive urination, Excessive thirst, Excessive hunger, Lethargy/lack of energy, Panting	Not as yet	Hopefully with Zycortal / Pred reduction

	Dog's name	Please note any issues or side effects your dog has been experiencing since starting Zycortal and Prednisone.	Have the issues been resolved yet?	How did you resolve the issues or how are you trying to resolve the issues?
8	Ted	Excessive urination, Excessive thirst, Lethargy/lack of energy, Panting, Diarrhoea, Leaking urine when asleep.	Not yet	I hope to reduce the amount of zycortal next time he has a shot. Also to reduce prednicare if suitable
9	Bailey	Excessive urination, Lethargy/lack of energy	No, i hope they will resolve as we reduce	
10	Cotton	Hair loss and weight gain	Weight is stable and hopefully hair will regrow with reduction in Pred.	By reducing his pred.
11	Oscar	He only got through 10 mg of pred for 2 days, he was way too energetic, took him down to his usual dose 2,5 + the 1,25 he got from his florinef. Started weaning him down after 8 days or so	Yes as soon as he got back to normal dose... no more problems	Giving less pred
12	Angus	Lethargy/lack of energy, He is now getting much better ears up tail wagging	Yep	By reducing the preds
13	Linda	Panting	Panting is relatively strong after the Injektion. It will be better over time.	We are at the beginning of setting, I hope that it gets better with the optimal dose.
14	Lulu	Urinary incontinence/leaking, Excessive thirst, Excessive hunger, Lethargy/lack of energy, Panting	No	
15	Vinnie	Urinary incontinence/leaking, Excessive urination, Excessive thirst, Excessive hunger, Lethargy/lack of energy, Panting	Yes with lower dose of pred.	Gradually reduced the pred against vet wishes from 15mg (not coping) down to 3.75mg.(much better)
